

Status of MXCuBE Beamline Control at BESSY II

Michael Hellmig,
on behalf of the HZB-MX group

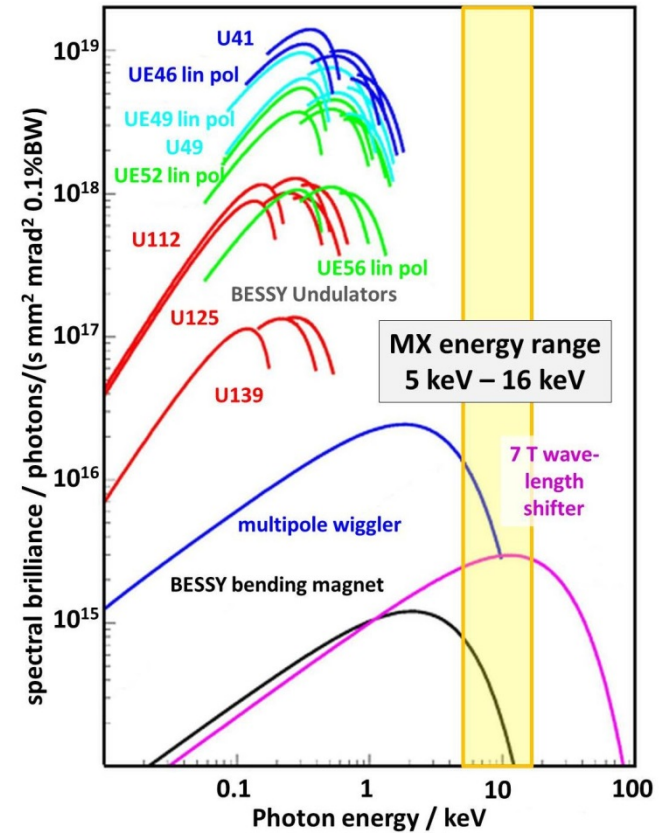

MXCuBE/ISPyB Joint Meeting, 11.09.-13.09.2018,
Elettra

BESSY II synchrotron characteristics

BESSY II ring parameters:

Electron Energy:	1.7 GeV
Electron Current:	300 mA
Circumference:	240 m
Straight sections:	16
Beamlines:	50

Synchrotron sources at BESSY II

MX experimental floor at BESSY II

BL 14.1 MAD

- MD2 with MK3
- Pilatus2 6M 12 Hz
- CATS: 90 SPINE samples
- MXCuBE 2.2 Qt4

- standard user operation schedule:
24/5 (Tuesday to Saturday)

BL 14.3

Upgrade in Progress

BL 14.2 MAD

- Nanodiff goniometer
- Pilatus3 2M
- [GROB: 294 SPINE & Unipuck samples]
- MXCuBE 2.2 Qt4

MX instrumentation upgrades

BL 14.1 MAD

- MD2 plate manipulator:
- available for user operation
- available at upgraded BL14.3 with MD2S

BL 14.2 MAD

Microphotospectrometer

Offline setup in MX-SpectroLab

Omar M. El Sayed,
University of Science
and Technology
Zewail City, Egypt

MX beamline 14.3: Update in Progress

- Main purpose:

- crystal optimization
- high-resolution data collection for small-molecule crystallography

Beam parameters:

- Fixed energy: 13.8 keV
- Photon flux: 5.5×10^{10} Ph./s

cw 37: mounting
goniometer granite

cw 40: mounting
detector stage

cw 42/43: MD2S
installation

cw 44+: commissioning
& control-software setup

MX beamline 14.3: Control-software setup

• Main components:

- Arinax MD2S
- Rayonix MX225
- Arinax HClab
- Arinax REX nozzle changer

• Control-software setup:

- CSS SPEC beamline control
- **MXCuBE Qt4** experiment control
- HClab integration

- MD2S:
standard exporter/Tango protocols
- MX225:
detailed detector setup open, use of LimA framework to be evaluated

MXCuBE: status and future plans

- current status:
 - **MXCuBE development delayed** due to instrumentation developments and problems
 - **MXCuBE 2.2 Qt4 running on both tunable beamlines BL14.1 and BL14.2,** control-software setup including **MXCuBE2 Qt4 in preparation for currently upgraded BL14.3** experimental station
 - ongoing **migration works towards use of abstract classes:** GenericDiffractometer, AbstractCollect
 - **migration to new MXCuBE repository layout** with single HardwareRepository submodule **in progress**
- short- and mid-term plans:
 - **evaluate Python3 and Qt5 compatibility** to comply with current standard Linux installations
 - **MXCuBE3 evaluation**
